Business Economics & IT student who turns data into insight and builds the reporting and structure around it. During my internship at Sprint365 I built Power BI dashboards used as the basis for internal decisions and designed the SharePoint information architecture behind a learning platform. I am curious about AI and automation, and I am in the final year of my bachelor with a master's planned next.

Core Competencies

- **Power BI & business intelligence:** Building reports, dashboards, and metrics across the full data lifecycle; turning data into decisions.
- **SharePoint & structure:** Designed SharePoint information architecture so knowledge and planning data are organised and easy to find.
- **Excel & analysis:** Structured analyses in Excel; data cleaning, modelling, and validation.
- **AI & automation:** Built an AI meeting-agent in n8n; applied AI; exploring where automation removes everyday manual work.
- **AI-native building:** I orchestrate a range of AI tools (Claude, Cursor, Gemini) to design and ship software end-to-end, e.g. Rangea, an EV app now in TestFlight.

Professional Experience

- **Sprint365 A/S** **Copenhagen, DK**
2025
Project Assistant (Internship)
 - Built Microsoft Power BI dashboards adopted as the decision-making basis for internal production management.
 - Designed SharePoint information architecture so knowledge and content were structured and easy to find.
 - Took data through cleaning, modelling, and validation, turning it into clear reporting for stakeholders.
 - Produced learning content, including videos, for the company's learning platform covering the Microsoft Dynamics 365 Finance & Operations (D365 F&O) ERP system.
 - Built an AI meeting-agent automation in n8n.
 - Bridged technical requirements and business goals in an Agile/Scrum team; earned a strong written reference.

Independent Projects

- **Personal project** 2025–Present
Rangea, EV companion app (TestFlight)
 - Designed and shipped an EV companion app end-to-end using AI tooling, taking full ownership from concept to a working product now in TestFlight.

Education

- **Business Academy Copenhagen** **Copenhagen, DK**
2023–2027
Professionsbachelor, Business Economics & IT
Internship graded 12; electives *Applied AI* and *Design of complex IT systems* both graded 10. Final year (expected Jan 2027); planning a master's from Sep 2027.
- **KVUC** **Copenhagen, DK**
2021–2023
HF (Higher Preparatory Exam)

Languages

- Danish (native), English (fluent).
